

Suyeong Park, Pharm.D., M.S.

EDUCATION

UT Southwestern Medical Center

Ph.D. Program in Basic Biomedical Sciences (Incoming)

Dallas, Texas, U.S.

Sep 2026

Seoul National University, College of Pharmacy

Master of Science(M.S.) in Pharmaceutical Sciences

Seoul, Korea

Mar 2022 - Feb 2024

- GPA : [REDACTED]
- Master's Thesis : Study on the Developmental Landscape of Human Innate T cells in the Thymus Using Single-cell Transcriptomics

Seoul National University, College of Pharmacy

Doctor of Pharmacy (Pharm.D.), Licensed Pharmacist, Ministry of Health and Welfare, Korea

Seoul, Korea

Mar 2018 - Feb 2022

- GPA : [REDACTED]
- Undergraduate Thesis : Development Strategies for Drug Delivery Across the Blood-Brain Barrier

PUBLICATIONS

- Lee M*, Park S*, Choi J, Bae SY, Ryu HS, Kim M, Kwak JG, Lee YJ. (2025). Human MAIT Cells Undergo Clonal Selection and Expansion during Thymic Maturation and Aging. *Experimental & Molecular Medicine*. (*Co-first authors)
- Lee Y, Choi J, Lee M, Kim S, Kang JJ, Shin S, Kim TH, Ji SH, Park S, Joo S, Lee K, Im SJ, Lee J, Lee YJ. (2026). RUNX2-AP-1 axis drives the differentiation of cytotoxic resident effector CD8 T cells in alopecia areata. *Manuscript submitted to Nature Immunology*

RESEARCH EXPERIENCE

Functional Genomics Laboratory, College of Medicine, Seoul National University

Research Assistant (Advisor: Murim Choi, Ph.D., Professor)

Seoul, Korea

Oct 2024 - Mar 2025

- Integrative Study of Public ScRNA-seq Datasets : to define conserved immunological mechanisms in autoimmunity.
 - Uncovered shared transcriptomic features of CD4⁺ and CD8⁺ T cells across multiple autoimmune conditions.
 - Explored the diversity of TCR repertoires in relation to underlying genetic variation.
- Gene Module-based Interactive-eQTL Analysis : to identify regulatory variants linked to immune-related genetic networks.
 - Constructed gene modules using hdWGCNA from COVID-19 patient data, focusing on CD4⁺ and CD8⁺ T cells.
 - Identified interactive-eQTLs associated with the expression levels of defined gene modules.

T Cell Development Laboratory, College of Pharmacy, Seoul National University

Graduate Researcher (Advisor: You Jeong Lee, M.D., Ph.D., Associate Professor)

Seoul, Korea

Mar 2022 - Feb 2024

- Developmental Profiling of Human Thymic Innate T Cells : to elucidate the role of autoimmune-linked clonal diversification.
 - Analyzed transcriptomic heterogeneity in the maturation of innate T cells, including NKT cells, MAIT cells, and $\gamma\delta$ T cells.
 - Mapped TCR clonal diversity across transcriptomic profiles to reveal preferential TCR usage within specific innate T cell subsets.
- CD8⁺ T Cell Exhaustion in Autoimmunity, alopecia areata in C3H/HeJ mouse : to delineate the signatures of autoreactive CD8⁺ T cells.
 - Characterized dynamic transcriptional changes associated with CD8 T cell exhaustion in autoimmunity.
 - Investigated inter-organ communication to determine the origin and migratory pathway of autoreactive CD8⁺ T cells.

Nano Bio-drug Delivery Lab , College of Pharmacy, Seoul National University

Undergraduate Research Assistant (Advisor: Yu-Kyoung Oh, Ph.D., Professor)

Seoul, Korea

Sep 2021 - Oct 2021

- Explored nanoparticle-based formulation strategies and neutrophil-mediated transport mechanisms for targeted delivery.

Laboratory of Clinical Pharmacy, College of Pharmacy, Seoul National University

Undergraduate Research Assistant (Advisor: Jung Mi Oh, Pharm.D., Professor)

Seoul, Korea

Aug 2020

- Conducted a meta-analysis on CYP2D6 polymorphisms and breast cancer recurrence in Tamoxifen-treated patients.

Laboratory of Neuro-pharmacokinetics, College of Pharmacy, Seoul National University

Undergraduate Research Assistant (Advisor: Suk-Jae Chung, Ph.D., Professor)

Seoul, Korea

Jan 2019

- Performed intravenous cannulation experiments to assess pharmacokinetic alterations in drug disposition.

PRESENTATIONS

- Master's Thesis Defense (Oral), Intra-thymic Maturation of Human MAIT Accompany Clonal Selection and Expansion Dec 2023
- KAI International Meeting (Poster), Intra-thymic Maturation of Human MAIT Accompany Clonal Selection and Expansion Sep 2023
- SNU Pharm Retreat (Oral), Intra-thymic Maturation of Human MAIT Accompany Clonal Selection and Expansion Aug 2023

HONORS & AWARDS

• Self-Development Essay Contest (Ministry of National Defense) Top 10 Award among active-duty Korean soldiers nationwide	2025
• Handok-Jaeseok Foundation Full-tuition Scholarship (Handok)	\$3000 semi-annually, awarded 7 times, total \$21,000 2018 - 2022
• Hana Mirae-Injae Scholarship (SNU Pharmacy)	\$500 monthly, awarded 18 times, total \$9,000 2020 - 2022
• National Scholarship (Korea Student Aid Foundation)	awarded 4 times, total \$10,000 2019 - 2021
• Academic Excellence Scholarship (SNU)	awarded 3 times, total \$6,000 2018 - 2020

TECHNICAL SKILLS

- Computational Biology & Bioinformatics: Linux, R, Python; scRNA-seq, pseudo-bulk/bulk-seq, Pathway analysis, Pseudotime analysis
- Genomics & Immunology: eQTL analysis, Gene module analysis, TCR repertoire and clonality profiling
- Wet Lab Techniques : MACS purification, Flow cytometry, Adoptive T cell transfer, Mouse colony maintenance and genetic backcrossing
- Software & Tools : FlowJo, GraphPad Prism

PROFESSIONAL EXPERIENCE

KATUSA (Korean Augmentation to the United States Army)

Sergeant, 3-2 GSAB, 2nd Infantry Division

Pyeongtaek, Korea

May 2024 - Nov 2025

- Served as Battalion Senior KATUSA, leading 40 peers and liaising between U.S. command and ROK soldiers.

Microbiology and Immunology Department, Seoul National University, College of Pharmacy

Teaching Assistant

Seoul, Korea

Mar 2022 - Feb 2024

- Prepared and delivered immunology lectures with hands-on experiments while providing feedback to support student learning.

DAYLI Partners, Inc. | Biotechnology Venture Capital

Research Assistant, Venture Capital Department

Seoul, Korea

Jan 2022 - Feb 2022

- Evaluated private companies utilizing spatial transcriptomics through peer assessment and market analysis.

A. Menarini Asia-Pacific Pte. Ltd. | Asia-Pacific Branch of an Italian Biopharmaceutical Company

Research Assistant, Pharmacovigilance Department

Seoul, Korea

Jul 2021 - Aug 2021

- Compiled global pharmacovigilance guidelines from the US, Europe, and Korea.

Seoul National University Bundang Hospital

Pharmacy Practice Trainee

Bundang, Korea

Nov 2020 - Jan 2021

- Completed 200 hours training in hospital pharmacy operations, enhancing knowledge of clinical and pharmaceutical roles.

MENTORSHIP

SNU Mentoring Program, Seoul National University

Mentor

Seoul, Korea

Apr 2023 - Nov 2023

- Provided 60 hours of mentorship to an underprivileged high school student on academic skillsets, relationships, and life perspectives.

KORMENT, Society Leadership Mentoring, Korea Scholarship Foundation

Mentee Team Leader (Mentor: Chang-soo Kim, Former CEO of Samsung Life Insurance (2014-2018))

Seoul, Korea

Feb 2021 - Dec 2021

- Developed a career roadmap grounded in fundamental research, expanding toward translational and therapeutic aims.

The 6th, 7th, 8th and 9th Mentor-Mentee Program, SNU Pharmacy Alumni Association

Mentee (Mentors : working in government, legal, and pharmaceutical companies)

Seoul, Korea

Mar 2018 - Dec 2021

- Refined understanding of specialization and personal expertise through mentorship in the pharmaceutical industry.

LEADERSHIP

PFRC (Pharmaceutical Finance Research Club), Seoul National University, College of Pharmacy

President, 5th Acting Member

Seoul, Korea

Mar 2022 - Feb 2023

- Organized seminar series featuring experts from venture capital and investment banking sectors.

DOPHARMINE, 37th Student Council, Seoul National University, College of Pharmacy

Deputy Director, Information & Communication Department

Seoul, Korea

Mar 2018 - Feb 2020

- Initiated and supported student-led club activities focused on academic enrichment and hobbies, promoting inter-cohort exchange.

First-Year Experience Program Design Team, KAIST

Program Designer

Daejeon, Korea

Mar 2016 - Feb 2017

- Planned and executed experiential programs for 1,000+ incoming students to encourage diverse, non-academic engagement.
